1. Manufacturing at WHO-GMP certified units.
2. Own testing labs and R&D.
3. Separate Quality management team.
4. Available stock and Prompt deliver.
5. Range of fast moving molecules.

- **PRODUCTS (USES).**

1. **CAPSULES.**

- **PEMOX-LBB** Tablet is a combination medicine that is used to treat various types of bacterial infections.

- **DENTAL.**

- **Peldent** is given orally, the metabolism of absorbed citrate produces an alkaline load. The induced alkaline load in turn increases urinary pH and raises urinary citrate by augmenting citrate clearance without measurably altering ultrafilterable serum citrate.

- **SYRUP.**

- **Lycop** syrup Is used for the temporary relief of cough, sneezing, or runny nose due to the common cold, hay fever or other upper respiratory allergies. This product contains a non-opioid cough suppressant.

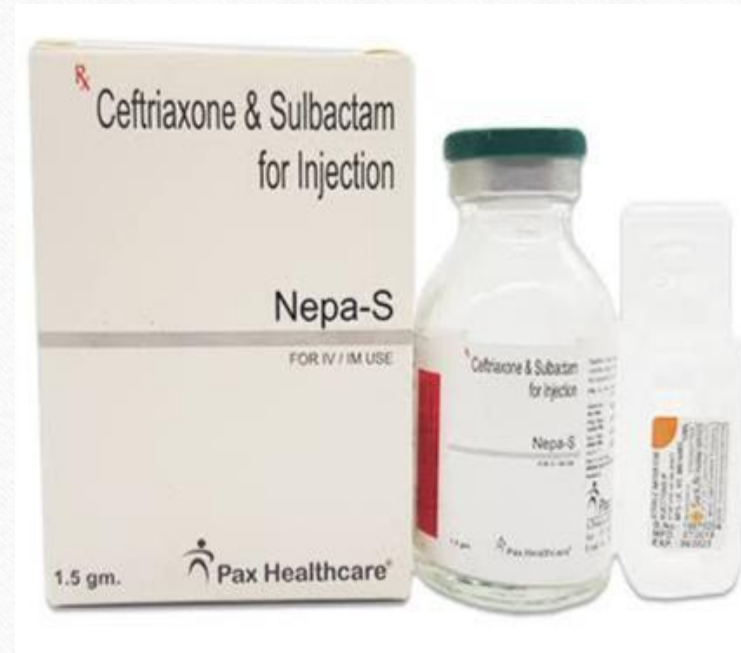

- **EYE DROP.**

- **Paxtobra** used to treat eye infections. Tobramycin belongs to a class of drugs called aminoglycoside antibiotics. It works by stopping the growth of bacteria.

- **INJECTION.**

- **Nepa-S** 1gm/0.5gm Injection contains two different medicines, Ceftriaxone and Sulbactam, that work together to kill the bacteria that cause infections. Ceftriaxone works by stopping the growth of bacteria. Sulbactam reduces resistance and enhances the activity of Ceftriaxone against bacteria.

- **PROTAIN POWDER.**

-
- **Fiboplex Protain powder** in Protein is an essential macronutrient that helps build muscle, repair tissue, and make enzymes and hormones. Using protein powder may also aid weight loss and help people tone their muscles.

- Liquid.

- Ongul Liquid/Syrup is a prescription medicine. It is helpful in treating acidity, heartburn and stomach ulcers. It relieves the symptoms such as stomach pain or irritation. It also helps in neutralizing and releasing excess gas from the stomach.

- **Tablets.**

- **Ondap** Tablet is an antiemetic medicine commonly used to control nausea and vomiting due to certain medical conditions like stomach upset. It is also used to prevent nausea and vomiting caused due to any surgery, cancer drug therapy or radiotherapy.

- **Sachet.**

- **Uni-not** sachet It kills the bacteria in the urinary tract by preventing them from forming their own protective covering. It also reduces bacterial attachment to cells lining the bladder. This helps treat or prevent uncomplicated infections of the bladder.

- Topicals.

- Rimep Lotion is used as a moisturizer to treat or prevent dry, rough, scaly, itchy skin and minor skin irritations (e.g., diaper rash, skin burns from radiation therapy).
