ABSTRACT

Rajkot is a city in the western Indian state of Gujarat. It consist semi arid type of vegetation. In campus of Shree M. & N. Virani Science college there are various type of trees and shrubs, herbs and climbers are grown. Angiosperms were the original source of most plant medicines. Many of the herbs and spices used by humans to season food also yields useful medicinal compounds and developed in part as a response to the threat of food-borne pathogens. Many of the herbal medicines have beneficial effects on long-term health when consumed by humans, and can be used to effectively treat human diseases. The use of herbs to treat diseases is almost universal among non-industrialized societies, and is often more affordable than purchasing expensive modern pharmaceuticals.

We gathered knowledge about their habitat, morphology, taxonomy. This information helps us in broadening our views regarding the subject botany. Moreover, a well-designed and expert supervised curriculum of botany syllabus deepened our interest in the subject. Hence, we got the golden chance to study the different practical aspects of plant diversity in the nature's lap. The other important factors, which have proved helpful in our study is the botanical garden of SHREE M & N VIRANI SCIENCE COLLEGE. The Virani science college's botanical garden is developed with utmost care and includes many varieties of plants. The garden is incorporated into an area of 6600 sq.ft (zone-1) and includes 79 species of plants and 44 families. Hence, we studied a wide variety of plants resources and surveyed their medicinal uses during our academic year of 2018-2019. Present study deals with the valuable medicinal plants.

Brief Summary / Report of activity:

Students and Faculties were actively participated in the tree plant on program which was held on 15/08/2018 with society people. Participants were highly enthusiastic to make it a big success. The students planted fruit and non-fruit saplings, and fenced them and watered the plants. Every step of the programme was appreciated by the society people. The programme created a great stir among the general public too. The society people took the responsibility to nourish and maintain the allocated plant. Eventually, the society attained a glorious look.

ABSTRACT

Social tree plantation is an additional aid to plant conservation. It is a program which aim to create multipurpose village and society awareness create in people. In these program government and NGO follows different areas like government waste land, community land, some margin farm land, urban and industrial area, along road side, canals and railway line. So thus, we choose along street road sides and implement on that area. We have got started with the Ramkrishnanagar Society of Rajkot city. On 15th August went to the plantation program, grow plants like Barmasi, Rubber, Karanj, Ratrani, Karen, Champa, Bili, Cassia, Madhumalti, Kadamb, Tecomella, Ixora, Borsalli, Bakane limbado, Neem, Saptaparni and other flowering plants which have some medicinal values. Aware all the people of the society by explaining the importance of plantation that how plant keeps the air pollution free and how small planters absorb the impure particles. By awaring them to grow plant on road side and even at their home by different techniques of the plantation like creating small gardens and growing the trees as they reduce the amount of harmful toxic gases. Present paper deals with small scale awareness program created by local people of Ramkrishna nagar area. It is a program which aim to create multipurpose and social forestry conservation and we are a part of this little effort of this case study and tried to maintain ecological balance.

Vedant Foundation – Rajkot and Shree Manibhai Virani and Navalben Virani Science College, Rajkot jointly organized Menstrual Hygiene Management Awareness workshops at rural and urban government schools. From 2019 to 2022, total 14 workshops have been organized where female faculties and student volunteers of the college have trained 870 girls. The science of period is explained along with do's and don'ts. Awareness book, 'I am Ready' prepared and published by Vedant Foundation is distributed among girls.

The awareness activity is conducted every year in near by villages during the NSS special camps. The women and girls are being counselled and trained with scientific information on importance of menstrual hygiene and usage of sanitary napkins. Around 1000+ sanitary napkin packets have been distributed to beneficiaries along with adequate training.

Department of Chemistry
On
17 November, 2018-Saturday

For the students of
B.Sc. Chemistry - Semester-VI

Activity Report

Title of Activity	Ankur Pvt. Ltd.- 1-Day Training -2018
Special Theme	1-Day Training Programme
Activity Schedule	17 November, 2018-Saturday
Venue	Ankur Pvt. Ltd.
Resource Persons	
Activity Coordinator	Dr. K. B. Shurma (Departmental Coordinator)
Total No. of Participants	05
Details of Participants	Students of B.Sc. Chemistry, Semester-VI

Outcomes of the Activity:

- Students got exposure to current trends in industry/market.
- Students got an idea that how to handle some sophisticated instruments.
- Students got knowledge regarding the various application of the sophisticated instruments.

SSIP Activity Report

1. **Title of the Activity:** State level poster presentation on "Chemistry for Mankind"
2. **Venue:** Shree M. & N. Virani Science College (Autonomous), Rajkot
3. **Brief Description of the Activity:** State level poster presentation on "Chemistry for Mankind"
4. **Activity Schedule:** 10:30 am to 01:30 pm on 29/09/2018
5. **Activity Coordinator:** Dr. Pratik Ambasana
6. **Activity Organizers:** Department of Chemistry, Shri Manibhai Virani & Smt. Navalben Virani Science College (Autonomous), Rajkot and Student Statup & Innovation Policy (SSIP)
7. **Participants' Details:** 247 Students of UG/PG (From different college, Rajkot Region)
8. **Outcome of the Activity:**
 - Students got exposure to current trends in chemistry.
 - Students got an idea on the presentation skills.
 - Students interacted with current researchers.
 - Students got immediate feedback from other researchers.
 - Students had developed effective communication skills.

SSIP Activity Report

1. **Title of the Activity:** State level poster presentation on "Chemistry for Mankind"
2. **Venue:** Shree M. & N. Virani Science College (Autonomous), Rajkot
3. **Brief Description of the Activity:** State level poster presentation on "Chemistry for Mankind"
4. **Activity Schedule:** 10:30 am to 01:30 pm on 29/09/2018
5. **Activity Coordinator:** Dr. Pratik Ambasana
6. **Activity Organizers:** Department of Chemistry, Shri Manibhai Virani & Smt. Navalben Virani Science College (Autonomous), Rajkot and Student Statup & Innovation Policy (SSIP)
7. **Participants' Details:** 247 Students of UG/PG (From different college, Rajkot Region)
8. **Outcome of the Activity:**
 - Students got exposure to current trends in chemistry.
 - Students got an idea on the presentation skills.
 - Students interacted with current researchers.
 - Students got immediate feedback from other researchers.
 - Students had developed effective communication skills.

Title of Activity	Expert talk on “Applications of GLP in Industries”
Special Theme	GLP in laboratory practices
Activity Schedule	06 March, 2021 - Saturday
Venue	Classroom No. 302, 3rd Floor, Science Building, ATMIYA University
Resource Persons	Dr. Ajay Pandya
Activity Coordinator	Dr. A. S. Patel
Total No. of Participants	78
Details of Participants	Students of M.Sc. Chemistry, Semester-II

Outcomes of the Activity:

- An overview and importance of GLP in industries.
- Students understand preparation of sample from the food products and pharma products.
- Students got exposure to various methods of analysis of Pharma and Food products.

ABSTRACT

Present work aimed for the synthesis of a promising MTSA-Si catalyst and its application for biodiesel preparation using WFO. It has been illustrated from the experimental results. The most favorable reaction conditions for the biodiesel preparation using WFO are (i) 1:6 oil to methanol molar ratio, (ii) 5% MTSA-Si catalyst (wt%), (iii) 130 °C reaction temperature and (iv) 10 h reaction time, for the 96.22% yield of biodiesel. The side product raw glycerol was further transformed into the triglycerides over MTSA-Si catalyzed lauric acid esterification. The fuel properties of biodiesel were estimated and correlated fuel standards.

Introduction

Currently, alternative energy research community across the world is insisting for an exploitation of alternative energy resources in order to minimize consumption of the traditional energy resources by virtue of their everlooming depletion and growing destructive consensus on the climate [1]. The manufacturing of second generation biodiesel from non-edible oils like, *Jatropha curcas*, *Sterculia foetida*, *Castor* plants and *Cerbera manghas*, as well as waste frying oil has been become the key of energy insufficiency to counter any reduction in the supply of edible oil resources to the food manufactory [2–4]. Biodiesel is being produced from the reaction of vegetable oil or animal fats with a shorter chain alcohol like methanol or ethanol in presence of a relevant catalyst. The global energy insistence is increasing day-to-day, while the repository of conventional fuels such as coal and petroleum are reducing constantly. Besides, the consumption of conventional fuels motives the global warming by raising the effects of greenhouse gases notably. Biodiesel is a non-toxic, biodegradable and green alternative by virtue of its lower emission figurations. Contradictory to these dominance, the most significant disadvantage of biodiesel is its higher cost than conventional fuels [5,6]. Such alternative fuel has received considerable attention due to its being produced from non-conventional sources and it potentially lower down the climatic impact in association to conventional diesel fuel [7]. Biodiesel synthesis is mainly executed by the transesterification of oils over homogeneous, heterogeneous and enzymatic catalysts [8]. The currently

well-established manufacturing facilities for biodiesel synthesis are mainly based on homogeneous base catalysis [9]. The noncorrosive, eco-friendly and reusable nature of heterogeneous acid and alkali [10] catalysts makes them more suitable for the biodiesel synthesis with respect to homogeneous acid catalysis. However, they are associated with some limitations for their commercial scale production like, (i) complex synthesis process and (ii) difficulties in handling in application to commercial scale plants [11]. The booming production of WFO from domestic as well as industrial sectors is a worrying scrape globally by virtue of its oxidation and hydrogenation characteristics. Waste frying oil commonly abundant of free fatty acids, polymeric material and dimerization products, besides triglyceride, diglycerides and monoglycerides. This residue is habitually discharged into the water, arising the problems for drainage water treatment units and energy mislay, or is intersperse into the food cycle through animal foods, hence, becoming a potential cause of human health problems [12].

There are considerable applications of waste frying oil, such as in the production of soap, in production of energy through anaerobic digestion, in thermal cracking [13], recently, in the synthesis of biodiesel fuel [14], and much more. Waste frying oil (WFO) is the provocative alternative resource for the biodiesel synthesis due to its inherent in shortening expenses and environmental permission of biodiesel when correlated with traditional feedstocks. Therefore, waste frying oil as an adequate raw material for biodiesel preparation has attracted significant attention recently due to its reasonable price and smooth availability [15]. The physicochemical properties of WFO are tabularized in Table 1.

In recent times, the usage of solid acid catalysts were describe in literature as a most favorable key for biodiesel production, because it could potentially eliminate some reaction steps like complex iso-

UGC - SAP SPONSORED NATIONAL WORKSHOP ON FRONTIERS OF NMR SPECTROSCOPY AND MRI

25th September 2017

9:00 - 9:30 INAUGURATION FUNCTION

Lecture 1	09:30-10:15	Principles of NMR Spectroscopy	N. Suryaprakash
Lecture 2	10:15-11:00	NMR Interaction Parameters	N. Suryaprakash
	11:00-11:30	Tea	
Lecture 3	11:30-12:15	Analysis of ¹ H Spectra : Representative examples	N. Suryaprakash
Lecture 4	12:15-13:00	Decoupling and NOE	N. Suryaprakash
	13:00-14:30	Lunch	
Lecture 5	14:30-15:15	Multinuclear NMR and their Analysis	N. Suryaprakash
	15:15-15:45	Tea	
Lecture 6	15:45-16:30	T1/T2: Mechanisms & Measurements	N. Suryaprakash

26th September 2017

Lecture 7	09:30-10:15	Multiple Quantum NMR	N. Suryaprakash
Lecture 8	10:15-11:00	Polarization Transfer Techniques	N. Suryaprakash
	11:00-11:30	Tea	
Lecture 9	11:30-12:15	2D NMR Techniques	N. Suryaprakash
Lecture 10	12:15-13:00	Analysis of 2D Spectra, COSY, TOCSY, HSQC, etc. with representative examples	N. Suryaprakash
	13:00-14:30	Lunch	
Lecture 11	14:30-15:15	Chemical Applications of NMR: Study of Hydrogen Bonding	N. Suryaprakash
	15:15-15:45	Tea	
Lecture 12	15:45-16:30	Chemical Applications of NMR : Chiral Analysis	N. Suryaprakash
