Cardiopulmonary resuscitation (CPR)-COLS Hands-on Training

By

Indian Society of Anesthesiologist, Rajkot

Dr. Jaman Sakaria and Dr. Hetalkumar Vadera

Cardiopulmonary resuscitation (CPR) is a lifesaving technique useful in emergencies like heart attack or near drowning, in which someone's breathing or heartbeat has stopped. When someone's blood flow or breathing stops, permanent brain damage or death can happen quickly.

If you know how to perform cardiopulmonary resuscitation (CPR), you could save a life. CPR can maintain circulation and breathing until emergency medical help arrives.

Remember,

Your doing CPR could be someone's life.

12th September 2018

Time: 10:00-12:00 pm Venue: Step Auditorium

For M.Sc. Microbiology, Biotechnology, PG DMLT

Third Year B.Sc. Life Science and B. Voc MLMDT students
